Re: *IP-Enabled Services*, WC Docket No. 04-36; *E911 Requirements for IP-Enabled Service Providers*, WC Docket No. 05-196

Dear Ms. Dortch:

On October 18, 2005, Tekedra Jefferson, Assistant General Counsel; Ragui Kamel, Senior Vice President & General Manager, Voice Services; Sharon Kasimow, Director, Product Management; and Dr. Peter Bates, Chief Architect, Voice Service, all of America Online, Inc. ("AOL"), and the undersigned met with Thomas Navin, Julie Veach, and Christi Shewman of the Wireline Competition Bureau regarding the ongoing efforts of AOL to ensure that its interconnected VoIP service fully complies with the Commission's E911 rules. We described the features and functionality of AOL's Total Talk service which was recently introduced on a commercial basis. We also provided information regarding our E911 service which relies on agreements with third-party carriers to interconnect with the dedicated Wireline E911 Network. We further discussed the challenges associated with providing E911 in a nomadic environment, as well as the benefits of a solution based on the i2 standard. We also provided Commission staff with a copy of Total Talk's Terms of Service, and have included a copy with this filing as well.

Please contact me if you have any questions regarding this notice.

Sincerely,

/s/ Steven N. Teplitz

Steven N. Teplitz
Vice President and Associate General
Counsel
